

GOGO VISION

Instantly turn flight time into show time

Business travel doesn't have to be all business. Sometimes passengers just want a little downtime and fun time. With Gogo Vision, you can kick back to unlimited blockbuster movies and TV, immerse into a stunning 3D moving map, catch up on the news and even explore a library of e-magazines. All on-demand and available on your personal device.

For operators, Gogo Vision is a dream. It's fully integrated into all Gogo AVANCE solutions, so there's no extra hardware or software needed, and no streaming costs at all. Just turn it on and see your passenger happiness take off.

Vision+ or Vision360 gives you access to AVANCE over-the-air (OTA) updates. Allowing you to automatically update your Gogo Vision content, push AVANCE configurations, and remotely update your AVANCE system software. It's an incredibly easy way to keep your inflight experience up to date so you can be productive, entertained, and connected.

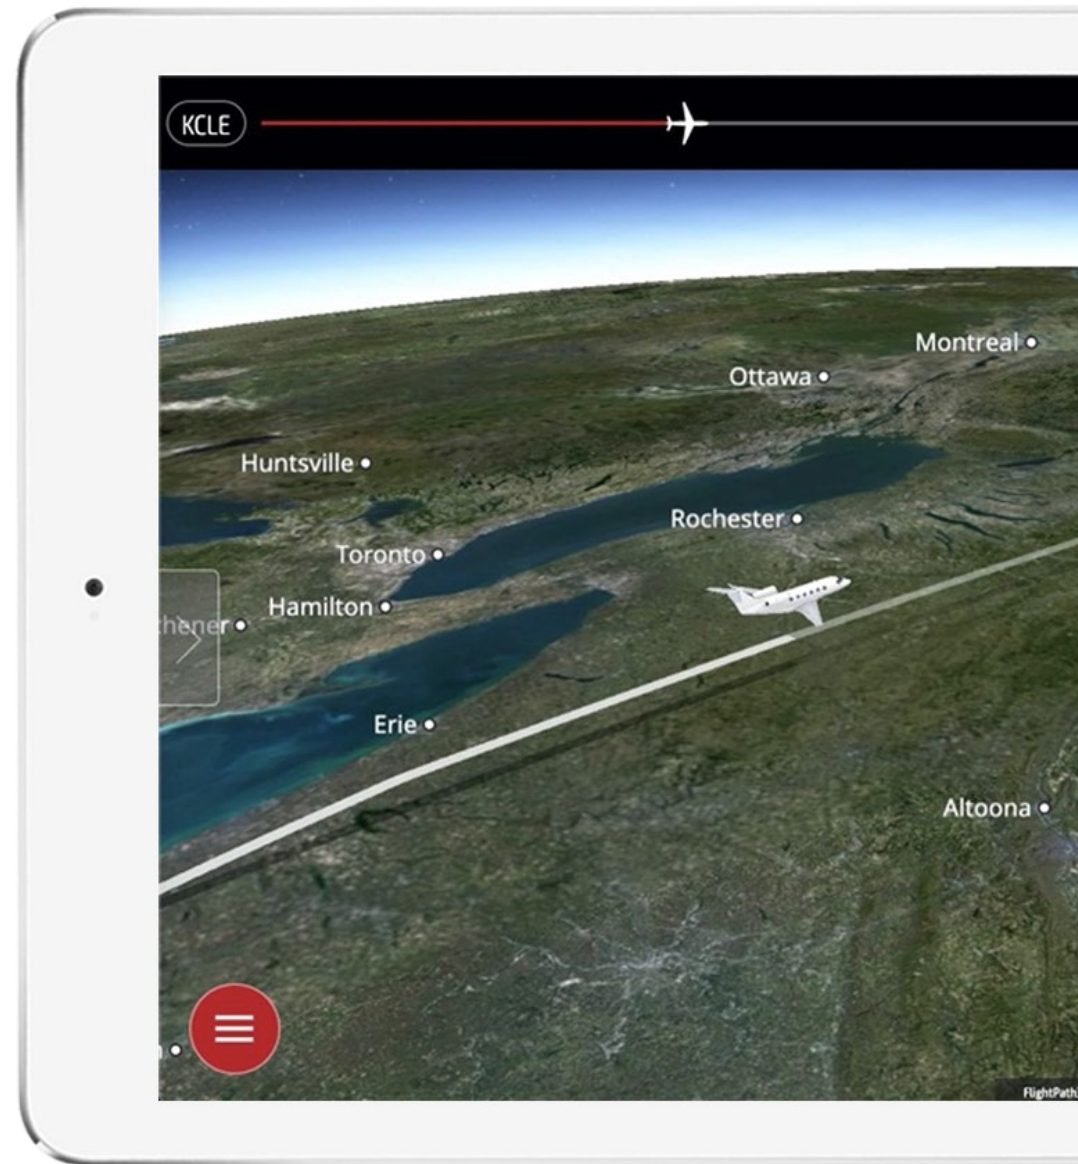

Everyone loves movies and TV

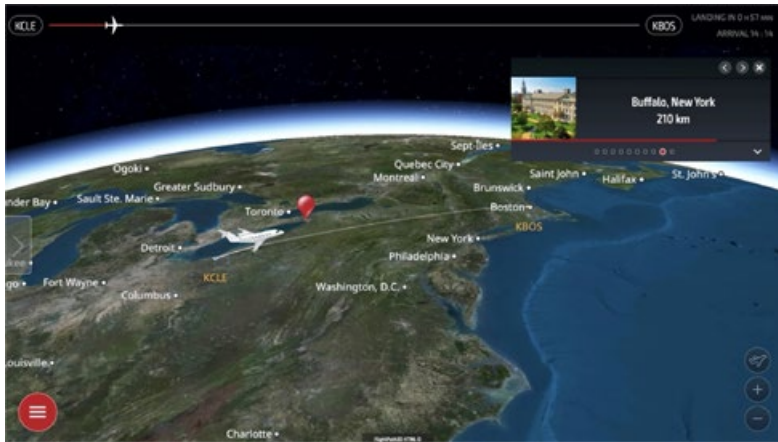

Blockbuster movies and binge-worthy TV shows are better than viewing the same old DVD—again. Now, with Gogo Vision you can sit back and enjoy the latest high-quality movies or TV episodes (subscription required) on your own personal device or equipped cabin monitors. The touchscreen interface lets you easily browse titles, or search and sort by genre, duration or content type.

See the flight and the world in stunning 3D

Captivate your passengers with an immersive, game-like 3D interactive experience, and engaging and informative Point-Of-Interest (POI) content. From departure to destination, everyone on board can use Gogo Vision to follow the flight path and view a realistic and detailed aircraft rendering set against a full 3D Earth satellite imagery background.

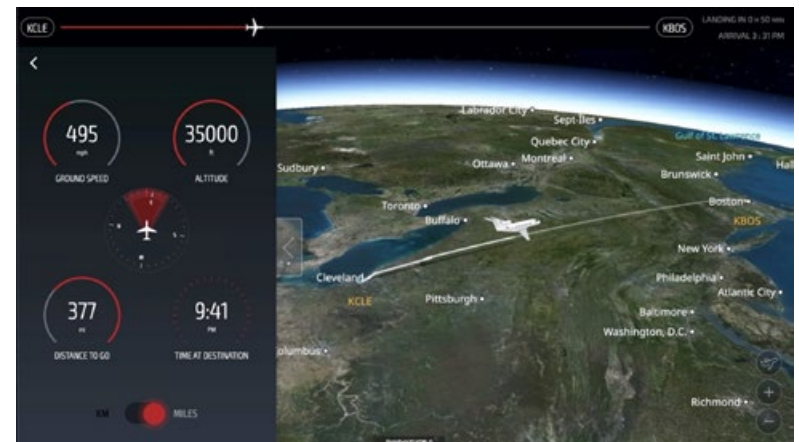

- › Stunning 3D for your entire flight path

- › Take in the pilots view from the cockpit

- › Explore global Points-Of-Interest (POI)

- › Get real-time flight data

Stay up on the news while up in the clouds

News happens fast these days, but you don't have to worry about missing it. With Gogo Vision, you can access recent Bloomberg news video clips (subscription required) to keep you informed while you're on the go. Check out market updates, politics, opinions and sports—or even what's happening at home and in the rest of the world. News clips are updated each time the aircraft lands, so you'll have fresh content aboard when you take off.

Ready for some reading material?

Take some time to catch up on your interests. The Gogo Vision eMagazine library (subscription required) features approximately 30 current publication titles - you're sure to find something to suit your mood.

Each publication features the most current issue plus the prior issue, all presented in a beautiful e-reader format. Vision eliminates the need for physical magazines and gives you a faster, safer, more engaging way to make the world of print available during flight.

Gogo Cloudport

Remotely keep your AVANCE system up to date without lifting a finger

Gogo Cloudport is a small, simple device that turns your hangar into a Gogo Cloud hot spot and gives you access to the Gogo Cloud network. You can automatically update your Gogo Vision content, push AVANCE configurations via DASH, and remotely update your AVANCE system software. It's an incredibly easy way to maintain your inflight experience so you can be productive, entertained, and connected.

Features

AVANCE over-the-air (OTA)

Cloudport enables AVANCE OTA to provide you the capability to maintain Gogo's optimal connectivity service level, ensuring your system remains up to date with access to the latest features and allows you to maximize equipment benefit.

OTA software updates via DASH

› Gogo AVANCE systems have the ability to perform remote software updates, keeping your system up to date without having to use a USB or even schedule downtime.

OTA content updates for Gogo Vision

› Automatically downloads new Vision content such as movies, TV shows, news clips and more, by utilizing a wireless connection to an onboard AVANCE system.

OTA troubleshooting for Gogo support

› Remotely collects Gogo information from your aircraft for Gogo Tech Support to troubleshoot issues.

OTA AVANCE configurations via DASH

› Use DASH MIX to customize connectivity configurations from your desk or phone and have it pushed remotely through a Cloudport to your aircraft.

A close-up photograph of a person's hand touching a tablet screen. The scene is dimly lit with a blue glow from the screen. The hand is positioned on the right side of the frame, with the index finger pointing towards the screen. The background is dark and out of focus.

Go global →

Make your experience international. Audio tracks for select movie and TV titles are available in English, Spanish, French, Italian, German, Swedish, and Russian. The Gogo Vision user interface can be translated into English, Spanish, French, Italian, German, Arabic, and Russian.

Easily access cabin controls →

Gogo Vision supports select Cabin Management Systems so you can access your CMS straight from the Vision app menu. Just tap to open your CMS, do what you need and get right back to your entertainment. (Contact Gogo for currently supported CMSs.)
